b. Talked with George Murphy, Joint Committee on Atomic Energy staff, again in an effort to establish a date for the security briefing of staff members present at the Director's briefing of the Joint Committee last week. Murphy indicated that it would be impossible to do anything today although he had talked with John Conway, Staff Director, regarding our conversation on Thursday and Conway had agreed to the briefing procedure. Although the Committee will be holding hearings both morning and afternoon for the remainder of the week, we plan to brief members of the Committee staff as they are available.
